DETAILED ACTION

Allowable Subject Matter

Claims 44, 45, 47 – 52, 65 – 70, 73 – 88 are allowed.

The following is an examiner's statement of reasons for allowance: Independent claim 44 has been amended to include the limitations of having a conductive tip made of unitary construction and protruding no more than 1mm from the edge of the plectrum.

These limitations show a difference to the prior art and are therefore allowable.

Independent claim 82 is allowable as discussed in the previous office action.

Specifically, the prior art does not disclose comparing a difference frequency (i.e., between a carrier and local oscillator frequencies) to obviate a false triggering signal association with a musical instrument plectrum. Independent claim 73 is allowable since the prior art does not show the use of "a triggering signal which includes a series of triggering pulses" wherein signal processing is in accordance with "a predefined relationship with the triggering signal." All claims which depend from these allowable independent claims are, therefore, also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
